

## Spring/Summer

**Competition Season:** Eventing, jumping, ponies, travelling and preparing for sales

### AnxiKalm Compete

**For an immediate calming effect.**

Use for nervous horses as required. For example for particular anxious situations such as travelling, competitions, sales and clipping. Also available as a gel to be given without food.

### NutriLyte

**For effective electrolyte replacement.**

Use particularly during hot weather and following intense exercise.

### EasoFlex

**For knocks and bumps.** Use for mild stiffness to discomfort interrupting training or working.

### StayTite

**Cooling leg gel for soothing and recovery.** Use Following a hard work out, for knocks or bumps and even strains & sprains. StayTite is a unique and superior alternative to the traditional clay compression. Also actively helps the stiffness and sensitivity following intensive physical activity.

## Autumn/Winter

**Breeding Season**

### MultiBoost

**High Strength Multi vitamin and mineral conditioner.**

A multivitamin tops up the system with essential vitamins or minerals that may be lacking from the animals daily diet.

### BioCopper

**Oral Copper supplement.**

Use for breeding animals during winter and spring months. Low copper levels are particularly prevalent in Ireland and the British Isles where soils have low copper levels or in areas where soil has a high Molybdenum level.

## All year round

### ArthriAid

**For improved joint mobility.** Contains Glucosamine, Chondroitin and MSM to ensure long term joint health. Use in competition and older horses.

### GastroCare

**For stomach complaints care.** Neutralises acid and maintains the stomach as normal.

ArthriAid™

The equine shock absorber

ArthriAid™ from NutriScience lubricates and promotes regeneration of the important shock absorbing tissues of your horses joints.

 **NUTRISCIENCE**
